

## C-SCREEN External Cable Blind

*Control natural light and heat*

Designed for controlling natural light, heat and solar energy from our harsh climate, our C-SCREEN external blind allows you to extend outdoor living areas, providing comfort and insulation all-year round. C-SCREEN's bracket and base fit features are one system covering many installation possibilities. Some innovative and fantastic features of this blind are the in-built levelling brackets at each end, magnetic base plates,

Dyneema cord looped holders and 25mm x 55mm extruded aluminium base rail which weighs 1.7kg per metre. The extruded aluminium roller tubes with size options of 80mm and 105mm allows for little to no distortion over 6500mm widths making it perfect for larger openings without the need for any intermediate posts or cables.

Standard finishes include clear anodised, pearl white and black satin custom colours are also available to suit any outdoor living space. Extensive screen fabric selections available to achieve optimum sun protection and privacy.

115 or 150mm Headbox

### INNOVATIVE FEATURES

C-SCREEN mounting brackets are manufactured from marine grade 316 stainless steel featuring an in-bracket levelling system. The brackets are designed in such a way that they can also be recessed for a completely unobtrusive installation.

All extrusions are designed to perform. The strong structured base rail weighs in at 1.7kg per meter minimizing the need for extra ballast.

C-SCREEN's magnetic system enhances the weight of the base rail with each module adding 12 kg of extra holddown, helping to keep the fabric tensioned in strong winds.

*The C-SCREEN is simple, strong and innovative.*

### CONTROLS

The range of controls come with several functions including timers, individual or multi-device operation or app and voice control.

Manual Operation via crank-handle

Hand-Held Remotes & wireless wall switches

Control via smartphone or by using your voice

### MOTORISATION

The C-SCREEN boasts an innovative motorised features including smart obstacle detection, auto learning and automatic self-tensioning. Using accurate and reliable obstacle detection, the intelligent motor will retract when an obstacle is detected to prevent damage.
