

## Internal Roller Blinds

*Shade and Privacy*

Soltex' contemporary range of internal roller blinds are designed to give maximum protection to windows and glass facades. Designed and manufactured in Perth, our range of blinds create an inviting ambience while providing privacy and protection against harmful UV rays and glare.

Roller Blinds can be operated via stainless steel chain or controlled using the latest in motorised technology. Control via a smart-phone application or simply by your voice by pairing to your Google home or Alexa device.

Multiple blinds can be linked for larger windows or doors and an option to enclose the rollers in a neatly designed cassette provides a sleek and modern finish. The stunning collection of solar control fabric choices provides you the freedom and opportunity to use your imagination to create modern or classical designs.
