Soltex Louvre Roof

All-Weather Protection

Control the weather and entertain all-year round with an Operable Louvre Roof by Soltex. You've seen it at restaurants and cafes and now you too can transform your outdoor entertaining area into a completely manageable space for all-year round use. Keep the heat and UV out during hot summer months, keep the rain at bay during winter, all at the touch of a button.

The custom aluminium louvre blades are adjustable from 0 to 180 degrees to provide the level of sunlight, shade and ventilation you desire. The Louvre Roof by Soltex can be installed into an existing structure, or a custom purpose-built design to suit any home or business. With an integrated gutter and optional downpipes, we can achieve a modern sleek and unobtrusive design. When closed, the Soltex Louvre Roof gives the presence of a stylish flat roof while providing all the benefits and features of an open roof.

Optional rain and sun sensors allow for fully automated climate control and when paired with one of our external zip blinds, the Louvred Roof is turned into a fully functioning outdoor room that can be used all-year round, rain, hail or shine!

The Soltex Aluminium Louvred Roof is engineered & manufactured in accordance with the wind & design codes of AS/NZ
