SOLTEX™ 

Awnings Patio roofs Glasoasen®

linear
harmonious
minimalist

Always aesthetically pleasing. When open the Kubata has a high-quality textile feel. When closed the awning cassette creates clean lines against the building facade with its almost perfectly square shape. The fabric and other components are well protected from the elements.

Simple with no visible fixings. Kubata's clear, uniform shape is not without reason. It stems from an overall aesthetic concept dominated by smooth surfaces. The awning cassette is enhanced by the clean appearance and no visible fixings – the result of weinor's sophisticated technological developments.

The house and awning in harmony. Where does the building stop, where does the sunshade start? With the Kubata cassette awning the transitions are smooth. With its cubic shape it blends perfectly into modern house architecture as a stylish design element. The sun protection and facade form a balanced symbiosis that meets the highest aesthetic requirements.

Honoured with:

Award winning design. In 2019 Kubata was awarded with the German Design Award and the iF Design Award.

High-quality modern fabrics and a large selection of frame colours

accompany the Kubata's clean design. Everything can be coordinated together wonderfully so the awning and house form one design element. The frame colours and fabric patterns also meet the highest quality standards.

Exclusive fabric quality

Choose your totally personal pattern from more than **140 fabrics**. Whether it's timelessly neutral, harmonious or creative trends: we have just the right fabric to suit your taste at weinor! And the innovative **solution dyeing** technology guarantees your fabric has long-lasting colour brilliance.

Frame colour WT 029/90146 | Pattern 4-786

The latest frame colours

At weinor you can select from more than **50 standard colours** and more than **150 other RAL colours**. The powder coating done in our in-house factory guarantees colour fastness and a uniform gloss level.

Perfect fabric positioning

A special **glide profile supports the roller tube** along its entire length and thus effectively prevents sagging. The fabric retains its perfect shape.

Ideal fabric protection

Teflon woven tissue protection and nanotechnology provide impregnation for the weinor awning fabric. The **dirt-resistant protective coating** also prevents soiling.

Kubata technical data

Max. width	6.5 m
Max. projection	4 m
Cassette dimensions	205 x 210 mm
Wind protection	tested to wind force 5 (Beaufort)
Pitch	5° – 40°
Installation alternatives	can be installed on walls, ceilings and rafters
Motor drive	as standard

Well protected against the wet and dirt

The all-round enclosed and robust **awning cassette** keeps the fabric and other component parts just as well protected from the elements as the **controlled rain drainage** within the front profile. As a result, you can enjoy your sun protection for many years. Kubata is fixed almost flush to the wall so that no rainwater or dirt makes the house wall dirty under the awning cassette.

Various installation options

Besides the standard wall mounting, Kubata can also be easily fitted if there are special site requirements.

Roof mounting
(on and under the roof)

Rafter mounting
(with protruding roof)

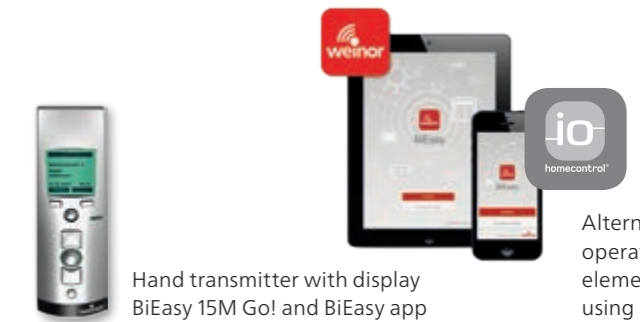

Atmospheric light, powerful warmth

Your options for great comfort: spend pleasant evenings on the patio under **LED spotlights** that can be dimmed infinitely and are integrated in the awning cassette. You can even enjoy your patio at cooler times with the **Tempura Quadra Universal heating system**. It can be retro-fitted and is unobtrusively fitted to the house facade.

Nice and taut and windproof

The low-noise **weinor LongLife arm** with 10-year warranty impresses with its very high tensioning strength. This ensures the fabric is exceptionally well positioned. The tried and tested wind lock safety device prevents the awning from lifting up when wind gusts from below.

Hand transmitter with display
BiEasy 15M Go and BiEasy app

Alternatively, you can also operate every technical element on your patio using **io-homecontrol®** from **somfy**.

Convenient control by hand transmitter, sensor or app

Design meets user friendliness: Kubata is equipped as standard with a drive without remote receiver. If you choose a remote-controlled motor with **weinor BiConnect radio control**, you can really easily operate the sun protection, lighting and heating using the hand transmitter or BiEasy App for iPhone and iPad. The sun sensors makes the awning extend automatically.
